

## Ghost Lanterns

You will need:

Twine

Scissors

Cheesecloth

Zots or Double Stick Tape

Downloaded Ghost Faces from [Switchcrafted.com](http://Switchcrafted.com)

Assorted Paper Lanterns (lanterns that light up are especially fun)

1. Cut white or ivory cheesecloth in strips about 3 yards in length by 36" width (this is a standard width so you should only have to cut the length).
2. Fold the fabric in half and cut a 1" hole in the center of the cheesecloth. This is where the twine will come through the fabric at the top of the ghost, and where you'll be able to hang it up from.
3. Expand the paper lantern so it is taught.
4. Drape a 3 yard section of the fabric over the paper lantern. Then, drape a second 3 yard section in the opposite direction.
5. Download, print and cut out the ghost faces from [switchcrafted.com](http://switchcrafted.com).
6. Use Zots or another strong double sided adhesive to stick the faces onto the fabric where the lantern is shaped as the "head" of the ghost to form a ghost face. (A hot glue gun works as well, but not intended for use by children)
7. Tie a piece of twine to the hook at the top of the lantern and hang!
8. If you have a lantern that lights up, turn it on. These lanterns, whether lit inside or not, also have a really cool glow with black light on them.
